TECHNICAL SKILLS

Languages: JavaScript(ES6, Node.js), CSS, HTML5, GraphQL | **Libraries & Frameworks:** Express.js, Handlebars, React.js, Node, Bootstrap, API, AJAX, jQuery, Sequelize | **Database:** MySQL, MongoDB, NOSQL | **Tools:** GitHub, Git, Git Bash, JSON, REST API, MySQL Workbench, Heroku, Framer Motion

TECHNICAL PROJECTS

Are We There Yet | Full-Stack Software Engineer/Developer | [Website](#) | [GitHub Repo](#)

Search for adventure application with third party national state API and OpenMaps API using Javascript, HTML, CSS

- Utilized JavaScript to create a seamless user experience and make it easy for users to find the information they need.
- Incorporated local storage to allow users to save their favorite parks and view them in a separate tab.
- Developed a “Plan a trip” tab that allows users to create a list of things to do or they need.
- Added functionality for users to link to a website for more information on a specific park and save parks to their “My Favorite Places” tab.

Get Outside | Full-Stack Software Engineer/Developer | [Website](#) | [GitHub Repo](#)

A Full stack blog site using MongoDB, Express, React, Node.js, GraphQL, Bcrypt

- Developed a web application utilizing React framework for front-end development, allowing users to create and view blog posts about outdoor activities.
- Implemented a feature that allows users to view other users posts and comment on them & data stored in MongoDB.
- Used a GraphQL API with Nodes.js and Express.js server for handling data retrieval, addition, updates and deletion of posts.
- Built a polished UI with Material-UI for the design and layout of the application.

Key Change | Full-Stack Software Engineer/Developer | [Website](#) | [GitHub Repo](#)

Centralized internet commerce hub for musicians to buy and sell instruments using Handlebars, MYSQL, Sequelize, Restful API Routing

- Utilized MySQL to design and manage the database for the centralized hub for musicians.
- Implemented Handlebars.js for the dynamic and user-friendly layout of the platform.
- Built out the RESTful API routes using Express.js for efficient data manipulation and management.
- Used Bcrypt for secure user authentication and password encryption.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer | M3F Festival | Phoenix, AZ (Remote) Jul, 2022-Nov, 2022

- Developed and led the M3F Festival project, resulting in over \$250,000 in tickets sales in the first month.
- Worked with project managers and designers to gather and analyze user requirements and translate them into functional and visually appealing web applications, resulting in a 75% increase in user satisfaction.
- Utilized reusable components and optimized code to improve the maintainability and performance of the websites, leading to a 25% reduction in development time.
- Implemented responsive design principles to ensure that the websites were fully optimized for mobile and desktop devices, driving a 45% increase in website traffic.
- Utilized Git version control to manage and track changes to the codebase, resulting in a seamless and organized development process.

Frontend Developer | Oh WoW Company | Los Angeles, CA (Remote) May, 2022–Jul, 2022

- Design and establish user-friendly and fully mobile responsive website using React.js framework.
- Developed reusable code and optimized 3+ websites for the company to improve speed and performance by 40%.
- Troubleshoot and debugged applications codes for smooth execution and improved stability.

EDUCATION

UCLA ext. | Full-Stack Developer Certificate | Los Angeles, CA (Remote)

- An immersive 3-month full-stack web development bootcamp that specializes in Javascript, HTML, CSS, MySQL, MERN (MongoDB, Express, React, Node.js)
- Spent 1,200+ hours on intensive coursework through all phases of project development of full-stack applications including building, testing, debugging, and deploying.
